Clinical discipline

We use automated credit mapping to award CE credit. If you are a clinical healthcare professional, please select the appropriate clinical discipline to receive the appropriate CE credit.

If your discipline is not listed in the dropdown list, please select “Other”.

Examples

Nurse - a registered nurse would choose “Nurse” as their discipline type. If that nurse is also a Certified Healthcare Quality Professional, they would enter this information in the “specialty profile section”.

Pharmacist - a pharmacist would select “Pharmacist” as their discipline type, if that pharmacist also holds the FACHE credential, they would enter this information in the “specialty profile section”.

Depending on your discipline, you may need to provide additional information such as your license number or date of birth.

Click the “Save” button when complete.
